MFFE TYLER'S TANK

This bull is ready to work! He is sure footed, structurally sound and has that look of a dynamic herd sire that is desirable by the commercial cattleman and sought after by seedstock producers. We feel that the numbers do not match this guy and he will far outperform his EPD's. Homo Black and Homo Polled by test and with GV genetics on his sire side, what is not to love about this stud.

BEIKMANNS FARMER RED 280F

280F is out of one of the best red purebred cows in our herd, Beikmann's Glenda 280Z. He is a half brother to Lots #6 and 25.

Use this key as an easy way to identify your purchases.

Lot Numbers are Coded with PB, LX, LF, or FB

PB = Purebred

Denotes animals that are 87% or higher Limousin.

LX = Percentage Limousin

Denotes animals that have not yet been bred up to purebred status.

LF = Lim-Flex

Denotes animals that are 25%-75% Limousin with the balance mainly Angus or Red Angus.

FB = Fullblood

Denotes 100% Limousin, animals which are of full French Ancestry.

SCAS FOREFRONT 126F

This Double Black son comes from the heart of our program. His Dam was a many time Champion that has continued her success to the donor pen. This sound structured, bold bodied bull is made for the long haul. Plus his smooth shoulder, combined with his low birthweight makes a good combo to cover heifers. He's sure to be at the forefront of your program.

Progressive cow-calf producers recognize the value of hybrid vigor:

20% more pounds of calf weaned per cow exposed; 1.3 years of additional cow longevity; 30% greater lifetime production; and increased fertility. The Limousin and Lim-Flex Ultra-Mate Cross breeding system makes cross breeding easy to produce calves that excel in any market and replacement females that have longevity and productivity.

KGUM ARIAL 316A

This one has style, big framed, structurally correct out of one of Kaylee's show heifers that she won many shows with, PTAL YOO HOO. Lot #19A at side is PTAL GENERAL 913G, a 9-3-19 Black, Polled bull calf with BW of 86# sired by KGUM PTAL DAIQUIRI 613D (MAGS AVIATOR/AUTO BARLIE 413B). KGUM ARIAL is PE 11-30-19 to present to KGUM PTAL DAIQUIRI 613D.

PTAL BETTY BOOP 405B

If you want a great disposition in a moderate frame with a fancy red heifer at side don't miss out on this one. This cow's Dam was also the Dam of PTAL YOO HOO which was a great show heifer for Kaylee. Her fancy red heifer calf at her side, this showy heifer needs a kid to take her to shows. Lot #20A - PTAL GEE GEE 910G was born 8-16-19 at 56# and is Red and Polled and sired by KGUM PTAL DAIQUIRI 613D (MAGS AVIATOR x AUTO BARLIE 413B). PTAL BETTY BOOP IS PE 11-30-19 to present to KGUM PTAL DAIQUIRI 613D.

PTAL CLASSY LASSEY

Here is another daughter of PTAL YOO HOO, Kaylee's old show heifer who was the high selling cow/calf pair in the 2019 sale. This one is more moderate framed than her half-sister KGUM 316A LOT #19, but is out of WULF ZANE X238Z, which was one of the top 150 of all breeds for feed efficiency in the whole country. Lot #21A - At her side is PTAL GRANITE 912G; a Black, Polled bull calf which was born at 8-27-19 at 95# sired by KGUM PTAL DAIQUIRI 613D (AVIATOR x AUTO BARLIE 413B). KGUM CLASSY LASSEY is PE 11-30-19 to present to KGUM PTAL DAIQUIRI 613D.

How to read EPD's for Maternal and Growth Traits

CED - Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease.

BW - Predicts the difference, in pounds, for birth weight of the calf.

WW - Predicts the difference, in pounds, for weaning weight (adjusted to age of Dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

YW - Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

MK - The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

CEM - Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease.

SC - Is a good indicator of age at puberty, and is a highly heritable trait. EPD's for scrotal circumference are expressed in centimeters, with higher values indicating genes for larger yearling scrotal circumferences of sons and earlier puberty of daughters.

DOC - Predicts genetic differences in probability that offspring are scored a 1 (docile) or 2 (restless) as opposed to 3, 4, 5, or 6 (nervous to very aggressive). Higher EPD values for docility represent genetics for calmer behavior.

How to read EPD's for Carcass Traits

YG - Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

CW - Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

REA - Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

MB - Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

SMTI - Predicts genetic differences in profit per carcass by combining the potential for and value of post-weaning growth, quality grade and yield.

Limousin is ranked #1 across all breeds in

Docility

6205 S Main Street
Suite D-280
Aurora, CO 80016

For more information,
please contact NALF

303.220.1693
Limousin@NALF.org

LIMOUSIN, after 25 years ranks #1 in docility scores. The LIMOUSIN breed was one of the first breeds in the continental United States to address docility and temperament of cattle over 25 years ago. NALF's breeders began to record docility scores for cattle and utilize a docility EPD in their culling process and mating decision in an effort to make quick improvement in their cattle. Since the initiation of the IGS BOLT EPD single-step cattle evaluation that allows breeders to compare EPD traits across various breeds, LIMOUSIN now ranks #1 for docility.
